### Ashikaga Flower Park

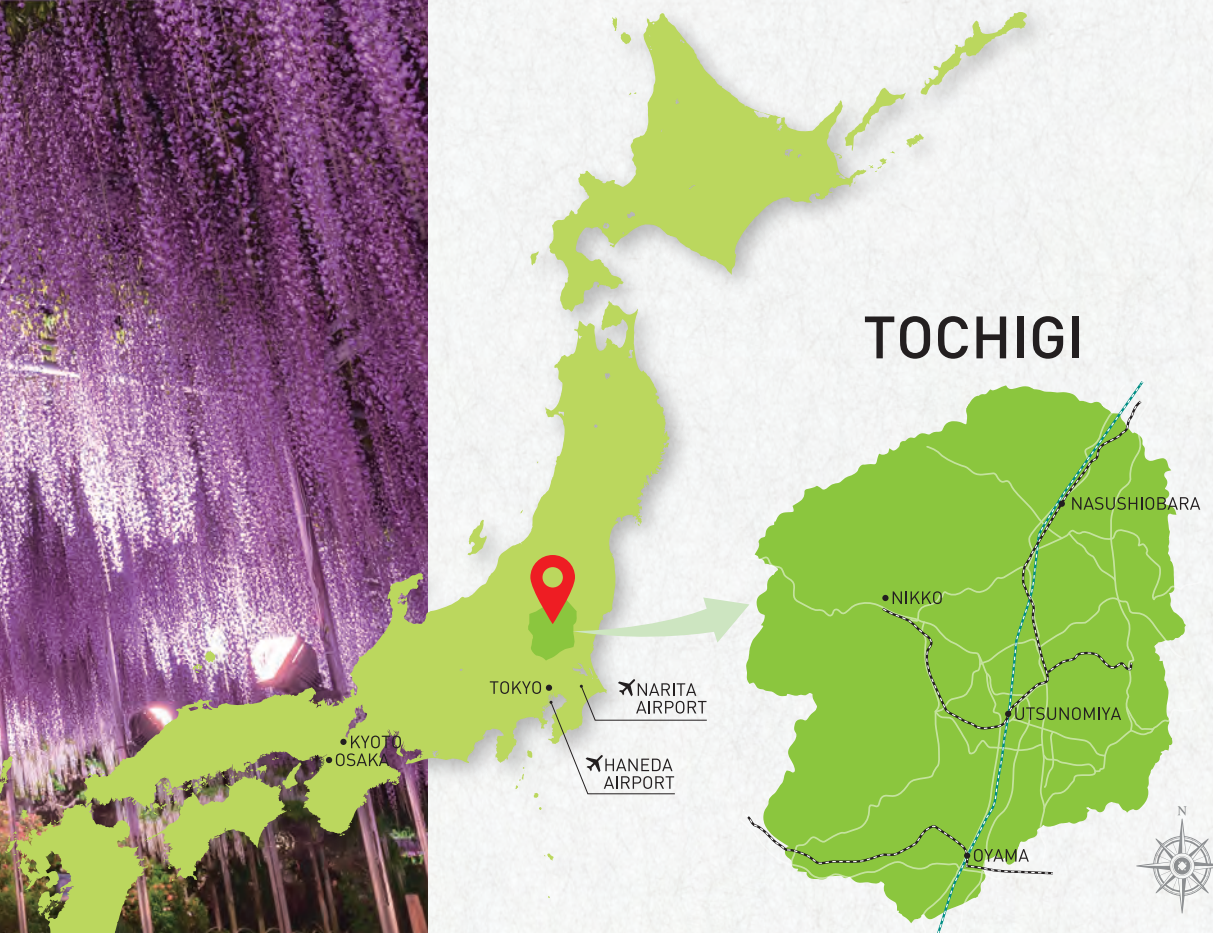

The large wisteria trellises in this park are a magnificent attraction to be hold in the springtime. The "Kiseki no Fuji" (Wisteria of Miracles) is more than 150 years old, and was selected in CNN's "Dream destinations for 2014" as a spot much like the "Tree of Souls" in the movie Avatar, directed by James Cameron. The spot has since become even more popular as a tourist attraction.

## Japanese saké in Tochigi

There are many saké breweries in Tochigi Prefecture, where many famed brands of Japanese saké are produced. Tourists can visit these breweries to take a look inside of these facilities—an experience ordinarily not possible.

### Watanabe Sahei Shoten

Nearly all of the saké brands at this brewery are brewed from pure rice, in line with the brewery's philosophy that "the original local brew is pure rice saké." Brewery tours are also available in English (reservations required).

### Katayama Shuzo

Founded in 1879, this brewery manufactures saké from famous Nikko natural water, with an attention to detail using the techniques passed on through the generations from Echigo Toji (master brewers).

### Tonoike Shuzo

Visitors can enjoy the atmosphere of this brewery, which is full of nostalgic emotion and dignity. Mashiko Ware drinking containers are also sold here.

### Shimazaki Shuzo

This brewery uses the caverns where the remains of their underground factory stood at the end of World War II as a cellar for brewing their refined saké. This cellar was under construction at the latter part of the war.

## Oya History Museum

This history museum features the mining history of Oya stone.

The museum contains the old mining site, a massive 20,000 m underground cavern.

The fruit of these strawberries is exceptionally large, and their colorfully glistening shape makes them look like a cluster of gem-like treasures.

Winter Scenery of Nasu Town

In the winter, the vast snowy fields of Nasu Town spread outwards, and the lovely scenery basking in the morning glow brings a fresh breath of nature to your whole being.

Yunishigawa Onsen

These hot springs carry the old tradition of being the place of respite for defeated Heike refugees from the battle of Dannoura to heal their wounds at the waters bubbling forth from the dry riverbed.

# Festival

Even today, festivals that preserve the traditions of old are carried out all throughout Tochigi Prefecture.

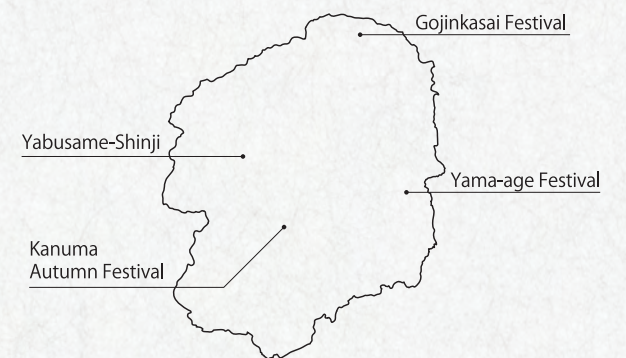

**Kanuma Autumn Festival** Held during the middle part of October

During the first day of this festival, chokoku-yatai (parade wagons with carved decorations) are brought into the precincts of Imamiya Shrine, where the Shinto ritual is solemnly carried out. A citizen's parade is held on the second day, after which more than 20 of the chokoku-yatai all come out at once to join the parade.

**Gojinkasai Festival** Held during the latter part of May

The participants dress in white garments and bear torches as they parade down from Nasu Onsen Shrine to Sessho-seki, and release their fires into a giant torch (the sacred volcanic fire), evoking a mystical mood.

**Yama-age Festival** Held during the latter part of July

This festival is held every July, and features outdoor kabuki dances of magnificent splendor that are one of a kind in Japan, honoring a tradition of over 450 years that dates back to 1560.

**Yabusame-Shinji** Held during the middle parts of May and October

An impressive Shinto ritual featuring horseback archery, where the archer skillfully steers his horse for an impressive bow-and-arrow performance. The "Sennin-Musha-Gyoretsu" (March of a Thousand Warriors), a procession that reenacts the march of soldiers from Mt. Kuno in Sunpu to Nikko attending the funeral of the spirit of shogun Ieyasu Tokugawa, is a breathtaking sight.
